BICCtalk: Cyber-Physical Systems und die internationale Dimension mit den EIT ICT Labs

Klaus Beetz – EIT ICT Labs, Business Director
klaus.beetz@ictlabs.eu
2013-09-30
The European Institute of Innovation & Technology (EIT) was legally established in 2009 as an independent agency within the EU.

- It funds Knowledge and Innovation Communities (KICs)
  - Official call and selection of the first three KICs in 2009/10
  - First KICs fully operational in December 2010
  - Further KIC’s planned till 2020
    - 2014: Raw Materials
    - Active Health and Living
    - 2016: Food for the Future
    - Added Value Manufacturing
    - 2018: Urban Mobility
EIT ICT Labs

Bringing ICT Innovations to Life

- From idea to product, from lab to market and from student to entrepreneur. We mobilise talents, technologies, and business across Europe by…

- Inspiring the innovation spirit within the existing European ICT industry
- Speeding-up the transformation of ideas and technologies into real products, services, and businesses
- Fostering entrepreneurship - a new breed of entrepreneurial engineers
- Catalysing the birth of strong SMEs and helping them to grow to become future global ICT leaders

EIT ICT Labs Business Development Accelerator
Selection Process in a nutshell

IMPORTANT REMARK: The process cannot be fully automated; the professional judgment of the Business Developer plays a critical role!
EIT ICT Business Development Accelerator
The entrance point

A set of criteria is used to evaluate start-ups, SME’s and partners for support

Main criteria to qualify for BDA support

- Promising business model and product/service offer
- High growth potential and real will
- Business in line with one (or more) of the Action Line
- Ambition to work on an international / European level
The Business Development Accelerator targets high potential SMEs and has established an European cluster of cluster on SME associations.
